"A lady came into my store lately and said "I have been using a New Perfection Oil Cook-Stove all winter in my apartment. I want one now for my summer home. I think these oil stoves are wonderful. If only women knew what a

comfort they are, they would all have one. I spoke about my stove to a lot of my friends, and they were aston-ished. They thought that there was smell and smoke from an oil stove, and that it heated aroom just like any other stove. I told them of my experience, and one after another they got one, and now, not one of them would give hers up for five times its cost."

The lady who said this had thought an oil stove was all right for quickly heating milk for a baby, or boiling a kettle of water, or to make coffee quickly in the morning, but she never dreamed of using it for difficult or heavy cooking. Now-she knows.

Do you really appreciate what a New Perfection Oil Cook-Stove means to you? No more coal to carry, no more coming to the dinner table so tired out that you can't eat. Just light a Perfection Stove and immediately the heat from an intense blue flame shoots up to the bottom of pot, kettle or oven. But the room isn't heated. There is no smoke, no smell, no outside heat, no drudgery in the kitchen where one of these stoves is used.

New Perfection

It has a Cabinet Top with a shelf for keeping plates and food hot. The nickel finish, with the bright blue of the chimneys, makes the stove ornamental and attractive. Made with 1, 2 and 3 burners; the 2 and 3-burner stoves can be had with or without Cabinet.

TUESDAY EVENING, MAY 3, 1910

Curious Village Names. There is in Dorset a group of villages which in some form or other have as their eponym the stream in whose valley they are situated. The stream is named Puddle, and the villages bear the names of Puddle Hinton, Puddletown, Tulpuddle, Affpuddle, Turner's Puddle and Bryan's Puddle. One is reminded of the riddle about the letter "m." Some, like Queen Mary, "have it before;" some, like King William, "have it behind." Poor things, poor things! "The inhabitants of these villages,' says Marcus Dimsdale, who writes in the Cornhill Magazine on "English Village Names," "sent to a former postmaster general-if I am rightly informed, Cecil Raikes-a request that they might be allowed to change their names and replace them with more euphonious substitutes which they obligingly supplied. Back came the official reply, curt, overbearing, inexorable, 'l'uddle you are, and puddle you must remain!"

Dr. Hale's Day.

Dr. Hale and the late Bishop Huntington of New York were fast friends. The latter had been a Unitarian, and his shift caused a sensation, says the Christian Register. The Episcopalians have saints assigned to the various days in the year. When an Episcopallan minister writes a letter on any day for which there is a saint he always writes the name of the saint at the close of the letter instead of the date. Bishop Huntington learned all these things quickly and began to practice them at once. The first time he had occasion to write to his old friend Dr. Hale after joining the church he placed "St. Michael's day" after his signature. A reply from the doctor came, and after his name he had written in a full, round hand, "Wash day."

A Little Awkward.

"Nearsightedness must be very embarrassing at times," remarked a Brooklyn resident to an acquaintance thus afflicted. "The other morning, for example, a man addressed me on a crowded bridge trolley, and in the course of conversation he roundly abused a chap whose political and business methods he disliked equally. In fact, he became acutely personal in his denunciation.

"Before he left the car he was informed by a friend near him that I was the man he had been abusing. It didn't worry me at all, but it must have been a bit disconcerting for him, don't you think?"-New York Globe.

The Sun. It has been stated that no one has ever seen the sun. A series of concentric shells envelops a nucleus of which we know nothing except that it must be infinitely hotter than the fiercest furnace and that it must amount to more than nine-tenths of the solar mass. That nucleus is the real sun, forever hidden from us. The outermost of the enveloping shells is about 5,000 miles thick and is called the 'chromosphere." It is a gaseous flood.

Prompt Rebuke. "Orlando, you mustn't put your arm

around my waist." "Why, Gloriana, it's been there for half an hour." "Well, I didn't notice it till just

now."-Chicago Tribune.

Thos. W. Robinson.
